

SECURE BUSINESS MOBILE APPS

As 75% of Mobile Apps are failing basic security controls, organizations are exposed to material security risks and waste substantial time to fix uncompliant mobile Apps. Sysmsoft specializes in enabling any category of mobile Apps self-defend against mobile threats without depending on the device configuration or ownership.

The Platform to secure Business Mobile Apps and Data

“Meet stringent mobile security requirements with minimal efforts while keeping focus on your business objectives”

WHY SYSMOSOFT MAKES SENSE

Unlike traditional mobility management solution, SENSE secures Apps and Data without controlling devices nor depending on device security capabilities.

App Centric

SENSE focus on securing Apps without requiring to install any profile or manage mobile devices

Fast & Simple

SENSE makes high-end security available to any enterprise Apps with minimal efforts

Trusted Security

SENSE is trusted by several Swiss banks to deploy highly sensitive mobile Apps and data

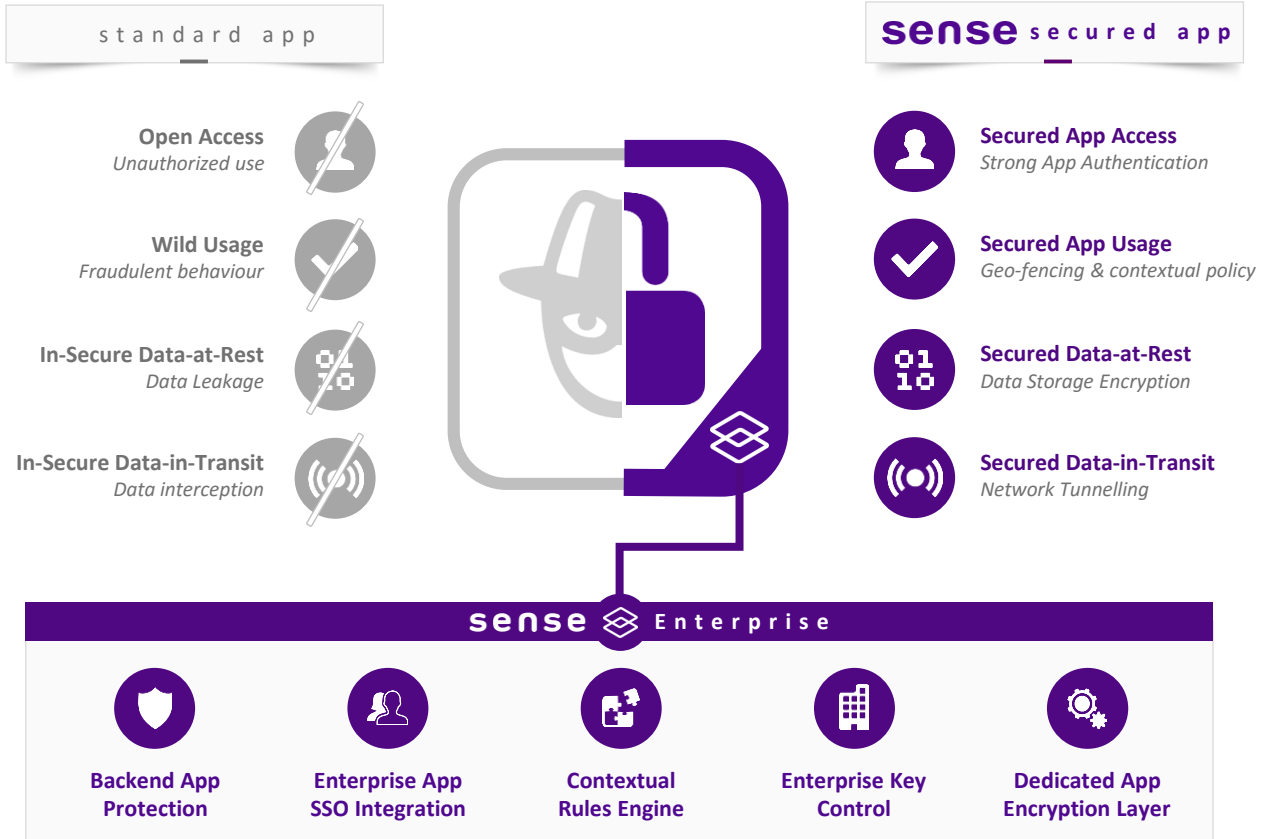

Integrated Solution

SENSE leverages existing infrastructure and works alongside of any EMM or MDM

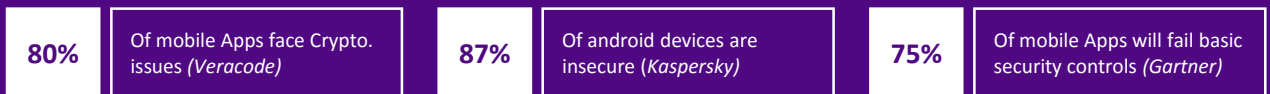

SELF-PROTECTED BUSINESS APPS

Unlike standard apps, sense secured Apps are capable to self defend against advanced threats independently from device security or configuration while leveraging company infrastructure.

MOBILE SECURITY FACTS
