

SENSE Smart Contract

Empower users with a mobile digital identity

Digitalize business critical decisions

SENSE Smart Contract is a highly secured solution designed for financial organizations looking to **redesign or enhance their digital experience**. In a **simple and intuitive** way, users can accept or refuse digital transactions, sign electronic documents, validate login to any system (VPN, e-banking, ...) or any other action that requires a user interaction. Advanced customization can be implemented to answer any kind of business requirement such as contract requiring multiple user approval, quorum and cross-border.

SENSE Smart Contract **drastically reduce the operational costs** by automatizing processes that are nowadays implemented by back-office resources.

Thanks to the SCSE and eIDAS regulations, it is possible to **legally bind** the decisions of users in Switzerland or abroad.

Benefit #1

Digitalize critical processes

Drastically reduce operational costs

Reduce internal and external frauds

Meet any compliance and regulation requirement

Benefit #2

Legally binding

Signed transactions guarantees 100% non-repudiation

Compatible with Swiss SCSE or European eIDAS regulations

Maintain audit-trail of mobile transactions

Benefit #3

Increase digital experience

Intuitive and simple app to validate any kind of transaction

Flexible on-boarding to provide excellent user experience

Promote bank image to clients through new mobile services
